

Edit Bale

Correcting a bale on the card when the goods and the sheet disagree

Feature **EDB-1** · Test case: bale **6061** · About 10 minutes · 02-Sep-2026

You need TWO people

Tester A — the editor. An **admin** phone. Makes the correction and sends it.

Tester B — the approver. A **different admin** phone. Approves it.

One person cannot do both: the bot blocks approving your own request. That block is Test 6.

Have ready

- Both phones logged in to **Black Panther_Bot**
- A **photo of the label** of bale 6061 (the sack marking)
- The bale physically in front of you, or its label photo
- This sheet and a pen

⚠ THIS TEST CHANGES THE REAL SHEET

Test only on bale **6061**, the bale the owner has already checked. It is genuinely wrong: the label says **6 pieces**, the sheet has **5**, because than 1 was recorded as one 60-yard piece when it is really two 30-yard pieces.

Do not edit any other bale during this test, even to "try it". Nothing is written until Tester B approves.

What this feature is for

When the physical bale does not match the sheet, an admin fixes the **card** until it matches the goods, and two admins sign it. The bot then changes the Inventory sheet itself.

✅ You CAN change here

design · shade · indent · the yards of each than · add a than

❌ You CANNOT change here

who bought it · sale date · price · status · warehouse

Those have their own doors. Removing a than is not built yet.

📋 Mark **PASS** or **FAIL** on every test as you go, write what you saw when it fails, and send the pages back to the owner. A FAIL is useful information — do not fix it yourself, do not repeat the test.

Run the tests in order · tick PASS or FAIL on each

TEST 1

Tester A (admin)

Open Edit Bale and find the bale

WHAT YOU DO

Say **Hi** to the bot →  **Inventory** →  **Edit Bale**.
Then type: **6061**

WHAT YOU MUST SEE

The bot asks for a bale number, then opens the card for 6061. The bale header and every than must match the sheet you know.

If the design has photos for more than one container, or the number exists in two stores, the bot first asks which physical bale — pick **Kano office**.

☐ PASS

☐ FAIL

Notes / what you saw instead:

Edit Bale

Type the bale number to correct — as printed on the label, e.g. **6061**.

You can change the design, shade, indent, the yards of each than, and add a than. Status, customer, price and warehouse have their own doors.

11:07

Cancel

TEST 2

Tester A

Read the card — it must be the truth from the sheet

WHAT YOU DO

Compare the card with the bale in front of you and with the Inventory sheet.

WHAT YOU MUST SEE

5 thans · 166 yd. Than #1 is **60 yd, sold to Qaribullah**. Thans #3 and #4 are green (available). The label photo line says **! needed**. There is **no**  Send button yet — nothing has changed.

☐ PASS

☐ FAIL

Notes / what you saw instead:

Edit Bale 6061 · 9043-A · #6 · Kano office

Indent: ST/1321

5 thans · 166 yd

#1 · 60 yd ·  sold → Qaribullah (18-Aug-2026)

#2 · 30 yd ·  sold → Ahmad (Mai Glass) (27-Feb-2026)

#3 · 25 yd · 

#4 · 24 yd · 

#5 · 27 yd ·  sold → Qaribullah (06-Aug-2026)

TEST 3

Tester A

Correct than #1: 60 yards → 30 yards

WHAT YOU DO

Tap **#1 · 60 yd**. The bot offers the lengths already in this bale.

Tap **30 yd**.

WHAT YOU MUST SEE

The card returns showing **#1 · 60 → 30 yd**, the total line becomes **5 thans · 166 yd → 5 thans · 136 yd**, a  line appears about the sold than, and  **Send for approval (1)** now exists.

The chips are this bale's own lengths (24 · 25 · 27 · 30 · 60).  **Other number** is there for a length the bale does not already have.

☐ **PASS** ☐ **FAIL** Notes / what you saw instead:

 **Bale 6061 · than #1** — now **60 yd** (sold → Qaribullah)

What does the label / the piece say?

TEST 4

Tester A

Add the missing piece: a new 30-yard than

WHAT YOU DO

Tap **+** Add a than → tap **30 yd**.

WHAT YOU MUST SEE

A new line **#6 · 30 yd · new** appears and the total goes back to **6 thans · 166 yd** — matching the label. The button now reads **✓ Send for approval (2)**.

166 yards is what the label says. If your total does not come back to the label figure, something is wrong — mark FAIL and stop.

☐ **PASS** ☐ **FAIL** Notes / what you saw instead:

Bale 6061 — add a than

How many yards is the extra piece? It becomes the next than number, available.

TEST 5

Tester A

The bot must refuse to send without the label photo

WHAT YOU DO

First tap **✓ Send for approval (2)** without attaching a photo.

Then tap **Label photo** and send the picture of the label.

Then tap **✓ Send for approval (2)** again.

WHAT YOU MUST SEE

The first tap is **refused** with the **!** line. After the photo, the card says **Label photo: ✓ attached**, and sending gives you **Submitted for approval** listing both changes.

If the bot lets you send with **no photo**, that is a **FAIL** — write it down.

☐ **PASS** ☐ **FAIL** Notes / what you saw instead:

Submitted for approval

Bale **6061** · 9043-A · Kano office

• #1: 60 → 30 yd (sold → Qaribullah)

• + #6: 30 yd (new, available)

Request: 4f2c8a91-7d3e-4b62-9a08-1c5e7f0d3b44

A second admin must approve — you cannot approve your own. The sheet changes the moment they do.

11:07

Back to menu

TEST 6

Tester A

You must NOT be able to approve your own edit**WHAT YOU DO**

Tester A: find the approval card in your own chat (if you got one) and tap  **Approve**.

WHAT YOU MUST SEE

A grey pop-up says you **cannot approve your own request**. The request stays waiting.

Normally Tester A is not even sent the card — the bot asks the OTHER admins. If Tester A never receives it, that is correct: mark PASS and move on.

☐ **PASS** ☐ **FAIL** Notes / what you saw instead:

 You cannot approve your own request — a second admin must review it.

11:07

OK

TEST 7

Tester B (second admin)

Approve, and check the card says what will happen**WHAT YOU DO**

On **Tester B's** phone: read the label photo and the approval card, then tap  **Approve**.

WHAT YOU MUST SEE

The card names the bale and lists **both** changes before you approve. After approving, the reply says the bale was corrected and gives the new totals.

Read the card before tapping. If it does not match what Tester A did, tap  **Reject** and mark FAIL.

☐ **PASS** ☐ **FAIL** Notes / what you saw instead:

BALE NO. 6061
DESIGN NO. 9043-A
COLOUR NO. 6
NO. OF PCS. 6
TOTAL 166

11:07

 Approval required

Ref: 4f2c8a91-7d3e-4b62-9a08-1c5e7f0d3b44
From: Muhammad

 Edit bale 6061 · 9043-A · Kano office — 2 change(s): #1: 60 → 30 yd (sold → Qaribullah); + #6: 30 yd (new, available)

All edit bale operations require 2nd admin approval.

Use buttons below to approve or reject.

11:07

 Approve Reject

 Request 4f2c8a91-7d3e-4b62-9a08-1c5e7f0d3b44 approved by Muhammad. Changes applied.
 Bale 6061 corrected — 1 row(s) updated, 1 than(s) added. Now 6 thans · 166 yd on the sheet.
 A sold than changed yards — the customer was billed for the old figure; reconcile it in finance.

11:07

TEST 8

Both

The bot and the sheet now agree with the bale**WHAT YOU DO**

Tester A: in the bot, ask for **Details of Bale 6061**.

Owner/Tester B: open the **Inventory** sheet and find bale 6061.

WHAT YOU MUST SEE

The bot shows **3/6 available · 79 yds**. In the sheet: than 1 now reads **30** and is still sold to Qaribullah; a **new row for than 6** (30 yards, available) sits at the **bottom** of the sheet with the same design, shade, indent, warehouse and container as its bale-mates.

The new row must be at the **BOTTOM** of the sheet, never inserted in the middle. If it is in the middle, mark **FAIL** immediately.

 Bale 6061
Design: 9043-A | Shade: 6
Indent: ST/1321 | Warehouse: Kano office
Price: 3,500/yard

Thans (3/6 available):

-  Than 1: 30 yds → Qaribullah (18-Aug-2026)
-  Than 2: 30 yds → Ahmad (Mai Glass) (27-Feb-2026)
-  Than 5: 27 yds → Qaribullah (06-Aug-2026)
-  Than 3: 25 yds
-  Than 4: 24 yds
-  Than 6: 30 yds

Available: 3 thans, 79 yds | Sold: 3 thans, 87 yds

11:07

☐ **PASS** ☐ **FAIL** Notes / what you saw instead: _____

TEST 9

Tester A

Cancel must change nothing**WHAT YOU DO**

Open  **Edit Bale** again → type **6061** → tap any than and change its yards → then tap  **Cancel**.
Open the bale again and look.

WHAT YOU MUST SEE

The bot says it was cancelled and nothing was changed.
Re-opening 6061 shows the bale exactly as Test 8 left it — **6 thans · 166 yd**, with your cancelled change gone.

Nothing is ever written until a **SECOND** admin approves.
If a cancelled change appears in the sheet, that is a serious **FAIL**.

 Edit Bale cancelled. Nothing was changed.

11:07

 Back to menu

☐ **PASS** ☐ **FAIL** Notes / what you saw instead: _____

TEST 10

Tester A

The things you must NOT be able to change here**WHAT YOU DO**

On the card for 6061, look for any way to change: **who bought a than**, the **sale date**, the **price**, the **status** (sold/available), or the **warehouse**.

WHAT YOU MUST SEE

There is **no button** for any of them. The only editable things are the three header chips (design · shade · indent), the than chips (yards), and  Add a than.

A sold than can have its **YARDS** corrected — that is intended (that is exactly the 6061 case). What must not be touched is who bought it, when, and for how much.

☐ **PASS** ☐ **FAIL** Notes / what you saw instead: _____

Report — send this page back to the owner

#	Test	Result		Notes (what you saw instead)
1	Open  Edit Bale, find bale 6061	☐ PASS	☐ FAIL	
2	The card matches the sheet (5 thans · 166 yd)	☐ PASS	☐ FAIL	
3	Than #1 corrected 60 → 30 yd	☐ PASS	☐ FAIL	
4	New 30-yard than added, total back to 166	☐ PASS	☐ FAIL	
5	Refused without the label photo; sent with it	☐ PASS	☐ FAIL	
6	Cannot approve your own edit	☐ PASS	☐ FAIL	
7	Second admin sees both changes and approves	☐ PASS	☐ FAIL	
8	Bot shows 3/6 · 79 yds; new row at the BOTTOM of the sheet	☐ PASS	☐ FAIL	
9	Cancel changed nothing	☐ PASS	☐ FAIL	
10	No way to change buyer / date / price / status / warehouse	☐ PASS	☐ FAIL	

Tester A (editor) — name: _____ phone: _____ date: _____

Tester B (approver) — name: _____ phone: _____ date: _____

Known and expected — do NOT report these as faults

- **No money is corrected.** Qaribullah was billed for 60 yards and received 30. The bot says so on the card and after approval, but it does not credit him. The owner is handling money separately.
- **You cannot remove a than.** If a bale has a row too many, report it to the owner — that door is not built yet.
- **A than that is in transit cannot be edited** until it is received.
- If someone sells or moves a than **between** Tester A sending and Tester B approving, the approval is **refused** with a message saying the bale changed. That is correct behaviour — redo the edit on the fresh card.

Questions during the test: stop and ask the owner. Do not repeat a failed test or try to fix data by hand.
