

Receiving a transfer in parts

How some or all bales of one batch transfer are confirmed as they arrive — the method, and a live test for Abdul to run.

Built 01-Oct-2026 from the code live on **main** (commit c1e3ffcd) · Owner's words, 30-Sep-2026: *"whichever goods he receives by that time, they can be updated instantly ... without making him wait for the remaining goods"* · Every card on these pages is copied word for word from the bot.

Who does what

Requester — anyone active raises the transfer (an ORDER: nothing is locked). Abdul may raise it himself.

Dispatcher — the person at the **sending** store. Ticks the bales loaded, sends the load photo.

Owner (admin) — approves a dispatch logged by a non-admin. An admin's own dispatch needs no approval.

Receiver — Abdul — the person at the **receiving** store. This test is his.

The example on these pages

Lagos → Kano office · design **9006** · shade **3** · bales **5801, 5802, 5803** · Musa dispatches · Abdul receives · reference **01Oct-01**.

Use any real route where **Abdul is at the receiving end**. Your bale numbers, dates and reference will differ; the **wording** of every card must not.

Needs: Abdul's phone, the sending store's phone, the owner's phone, the Inventory and ApprovalQueue sheets open on a computer.

THREE RULES — READ BEFORE THE FIRST TAP

1. Tick only a bale that is physically in front of you. The bot never ticks for you; a bale you cannot see stays on the road.
2. Every delivery needs its own photo of the goods received. Nothing changes until the photo lands — there is no skip.
3.  **Reject** sends the bales still on the road back to the sending store's records. Tap it only when goods are **not** being accepted — never to "close" a transfer.

How it works in one minute

A transfer leaves one store as **one load** (one dispatch, one photo). It may **arrive in several deliveries**. The receiver's card now has three doors:

Received

Everything still on the road has arrived. One photo. The transfer closes.

Only some arrived — tick them

Tick the bales here now, one photo. They go live at once; the rest stay in transit and the card waits for the next delivery.

Reject

The goods are not accepted. Only the bales still on the road go back to the sending store; bales already received stay.

Each delivery writes **one Transactions row** and one **receive** line per bale in BaleMovements. The transfer stays open (**pending**) until the last bale; the row then flips to **approved** exactly as before.

 Mark **PASS** or **FAIL** on every test as you go, write what you saw when it fails, and send a photo of the filled pages to the owner. Tests 1–4 set the load up; 5–12 are the receipt; 13–16 repeat it with a reject; 17–19 are quick guard checks.

The method — what the receiver sees between deliveries

Where	Before any delivery	After 1 of 3 arrived
The receiver's card	Confirm when the goods arrive and match...	- Shade 3 × 3 (5801 , 5802, 5803)  1 of 3 received ·  2 still on the road (5802, 5803)  Received confirms the remaining 2
The waiting line (card ·  list · details)	 With Abdul to confirm arrival · left 01-Oct-2026 · today	 With Abdul to confirm the rest · 1 of 3 received · left 01-Oct-2026 · today (the clock restarts at the last delivery)
The row ( inbox ·  list · My Tasks button)	01Oct·01 ·  LAG▶KAN · 3B	01Oct·01 ·  LAG▶KAN · 1/3B (received / logged)
My Tasks line	 in transit — confirm receipt	 1 of 3 received — confirm the rest as it arrives
Admins and the requester	— (told at dispatch)	 01Oct·01 partly received  (1 of 3) ... + the receipt photo
The dispatcher	—	the same line +  This delivery: 5801 + the photo
ApprovalQueue sheet, column E	pending	pending (still open) — becomes approved only when the last bale is confirmed
Inventory sheet, the bale's rows (H status · I warehouse)	in_transit · Kano office	5801: available · Kano office · 5802, 5803: in_transit · Kano office
Transactions sheet	—	one row, action transfer_stock, qty 1 ; the next delivery adds its own row (qty 2)
BaleMovements sheet	dispatch lines	one receive line for 5801, MovedOn = the delivery day

What the record keeps

Nothing new on any sheet. The transfer's own ApprovalQueue row remembers the bales confirmed so far, which Inventory rows they were, and one entry per delivery (when, who, which bales, that delivery's photo). A single all-at-once  Received writes no delivery record — it is the old receipt, unchanged.

The next delivery

Open the same card (My Tasks →  Transfers waiting on you, or  Transfers → tap the row).  **Received** now means "the remaining N".  **Only some arrived** lists only what is still on the road; a bale confirmed earlier is never offered twice. When only ONE bale is left, the tick door disappears —  Received is the only way, which is correct.

Things that are deliberately refused

- A photo cannot be skipped. ↔ Not now on the photo prompt stands the delivery down; nothing changes.
- An old copy of the picker (an earlier message) cannot tick into the current one — the bot says the card was replaced.
- Only the receiver (or an admin acting for them) can tap the card. Anyone else: "This action is for the assigned person only."
- A load that carries the **same bale number twice** (one number in two containers) shows no tick door — it is received in one go.
- Mark-as-done, re-raising the remainder as a new transfer, or editing the sheet by hand are NOT part of this method. If something looks wrong, stop and report.

Part A — put a three-bale load on the road (requester → dispatcher → owner)

Skip to Part B if a real transfer of **at least three bales** is already in transit to Abdul's store. Otherwise, do these four once. Cards shown are the requester's and dispatcher's; Abdul only watches until TEST 4.

TEST 1

Requester (anyone, e.g. the owner)

Raise a transfer of 3 bales to Abdul's store

WHAT YOU DO

Menu → **Transfer Stock** → pick the sending store → the design → the shade → **All 3** (or 3) → the receiving store. The bot picks the dispatcher and receiver from the Users sheet; on the confirm card tap **Send**.

WHAT YOU MUST SEE

The confirm card names the dispatcher and **Receiver: Abdul**. After Send, the requester's card reads **Transfer ... sent** and the dispatcher's phone receives **Transfer ... — please dispatch** with **Accept & dispatch** / **Decline**.

If the receiver named is not Abdul, stop: fix Abdul's warehouse in the Users sheet (column I) and raise it again.

 Accept & dispatch Decline

☐ PASS ☐ FAIL

Notes / what you saw instead: _____

TEST 2

Dispatcher (sending store)

Accept, tick the three bales loaded, send the load photo

WHAT YOU DO

Tap **Accept & dispatch**. Tick the three bale numbers that are physically loaded (the bot pre-ticks nothing) → **Review** → check the list and the date → **Dispatch** → send a photo of the loaded bales.

WHAT YOU MUST SEE

The picker counts **Selected: 3/3**; the review lists the three numbers; the photo prompt says **Nothing moves until it arrives**. After the photo: a non-admin dispatcher sees **... sent for admin approval** (nothing has moved yet); an admin dispatcher sees **... dispatched — bales logged** and Part A is done.

Write the three bale numbers here — every later test refers to them: _____ · _____ · _____

TEST 3

Owner (admin)

Approve the parked dispatch**WHAT YOU DO**

On the owner's phone open the card **Transfer ...** — **awaiting your approval** (the dispatch photo arrives with it). Check the three numbers against the photo, then tap **Approve dispatch**.

WHAT YOU MUST SEE

The owner's card becomes ... — **approved by you, dispatched**. The dispatcher gets ... **approved — the goods are now in transit to Kano office**. In the Inventory sheet the three bales now read status **in_transit**, warehouse **Kano office** (the receiving store).

Only needed when the dispatcher is not an admin (TRF-18). If the owner dispatched in TEST 2, skip this.

TEST 4

Abdul (receiver)

The incoming card arrives — and it has a new door**WHAT YOU DO**

Do nothing yet. Look at the card that lands on your phone the moment the dispatch is approved, and at the dispatch photo that follows it.

WHAT YOU MUST SEE

Exactly these buttons, in this order: **Received** · **Reject** on one row, then **Only some arrived — tick them**, then **3 bales — view all**, then **Dispatch doc**. The text lists the three numbers after **Shade 3 ×3** and ends **a photo/PDF of the received goods is required**.

If the **Only some arrived** button is missing, the bot on the server is older than this guide — stop and tell the owner.

ABDUL'S PHONE

TEST 17

Abdul

↩ Not now on the picker drops the ticks and nothing moves

WHAT YOU DO

Open 📦 **Only some arrived**, tick one bale, then tap ↩ **Not now**.

WHAT YOU MUST SEE

The picker message disappears; the card is redrawn where it stands with all its buttons; the sheet is unchanged. Open the picker again: every chip is 📦 again (the tick was not kept).

Also try ↩ Not now on the PHOTO prompt after a Confirm: the prompt and the sealed picker disappear, your card is back with its buttons, nothing is received.

☐ **PASS** ☐ **FAIL** Notes / what you saw instead: _____

TEST 18

Abdul

An old picker copy cannot tick into the live one

WHAT YOU DO

Open the picker from the card. Without closing it, open the SAME transfer from 📄 Transfers and tap 📦 **Only some arrived** again (a second picker appears). Now tap a chip on the FIRST (older) picker.

WHAT YOU MUST SEE

The bot answers 🗨️ **That card belongs to an earlier step — it was replaced. Use the current ... card.** and the older chip does nothing. Ticks on the newer picker count; ↩ Not now on the older one leaves the newer one's ticks alone.

☐ **PASS** ☐ **FAIL** Notes / what you saw instead: _____

ABDUL

🗨️ That card belongs to an earlier step — it was replaced. Use the current 01Oct-01 card.

11:07

TEST 19

Anyone who is NOT Abdul and not an admin

The card is Abdul's alone

WHAT YOU DO

From another employee's phone (not the dispatcher's, not the requester's), open 📄 Transfers and tap the transfer's row.

WHAT YOU MUST SEE

A pop-up: **This card is for the assigned person only.** The card does not open, so none of its buttons can be tapped; nothing changes. (The owner, as admin, CAN open it and act in Abdul's seat — the card then says 👤 **You are acting for Abdul — this is their card.**)

If an old copy of the card is somehow in that person's chat and they tap a button on it, the answer is **This action is for the assigned person only.** — same result.

☐ **PASS** ☐ **FAIL** Notes / what you saw instead: _____

5	Picker opens as a new message, all  , no Confirm	☐ PASS ☐ FAIL	
6	One tick → Confirm → photo prompt; sheet unchanged	☐ PASS ☐ FAIL	
7	Photo → 1 live, 2 in transit, row pending, card redrawn	☐ PASS ☐ FAIL	
8	Owner + dispatcher told, photo + delivery line	☐ PASS ☐ FAIL	
9	 Transfers and My Tasks read 1/3B	☐ PASS ☐ FAIL	
10	 Received asks for the remaining 2	☐ PASS ☐ FAIL	
11	Photo → closed in 2 deliveries; approved; 2 txn rows	☐ PASS ☐ FAIL	
12	Record keeps Delivery 1 and Delivery 2	☐ PASS ☐ FAIL	
13	Reject confirm: 2 back / 1 stays; Back returns card	☐ PASS ☐ FAIL	
14	Reject: 2 bales back at Lagos, 1 stays; row rejected	☐ PASS ☐ FAIL	
15	Closed record: 1 received · 2 returned; row  1/3B	☐ PASS ☐ FAIL	
16	Nothing waiting on Abdul	☐ PASS ☐ FAIL	
17	Not now drops ticks, moves nothing	☐ PASS ☐ FAIL	
18	Old picker copy is refused	☐ PASS ☐ FAIL	
19	Other phone is refused	☐ PASS ☐ FAIL	
20	All ticked = ordinary receipt (optional)	☐ PASS ☐ FAIL	

Bale numbers used — load 1: _____ · _____ · _____ load 2: _____ · _____ · _____

References (as printed on the cards, e.g. 01Oct:01): load 1 _____ load 2 _____ Date: _____

Receiver (Abdul) signature: _____ Dispatcher: _____ Owner: _____

Known and expected — do NOT report these as faults

- **The tick list starts empty.** The owner's first idea was "all ticked, untick the missing"; business rule 2 forbids pre-ticked chips, so you tick what arrived. The owner can change this rule.
- **With one bale left there is no tick door** —  Received is the only button, and it receives that one bale.
- **A transfer with the same bale number twice** shows no tick door and says so on the card; it is received in one go.
- **The hourly reminder keeps coming** for a partly received transfer until the last bale is confirmed or it is rejected. That is intended.
- **The Transactions date** on each delivery's row is the day the load LEFT the store (the dispatch date); the delivery day is on the BaleMovements line and in View details.
- **Dispatch is still one load.** A dispatcher cannot send a transfer in parts — only the receipt is split.

Questions during the test: stop and ask the owner. Do not repeat a failed test, do not use Mark-as-done, and never fix the sheet by hand to make a test pass.
