

Session record — Telegram ops bot

AtFactoryPrice · 10-Aug to 09-Sep-2026 · detailed from 31-Aug · generated 09-Sep-2026 from git (session Cqx55JnV)

106 COMMITTS THIS SESSION	29 FROM 31-AUG, DETAILED BELOW	16 OF THOSE SHIPPED CODE	8 FEATURES LIVE
---	--	--	---------------------------------------

Gate at close: 1,886 tests · smoke 609 checks · lint 0 errors (S-CUR currency lint in fail mode). Every commit was fast-forwarded to main after a green gate; the bot redeploys from there.

1 · Timeline, 31-Aug to 09-Sep

DATE	COMMIT	WHAT	KIND	SIZE
31-Aug	a9a41dcb	ANCH-1 — the confirm-sale wizard card follows the keyboard	SHIPPED	2 files · +171
31-Aug	e1246886	DML-1 — design artboards and build spec landed	DOCS	2 files · +546
31-Aug	6a56f7c1	DML-1 — the design movement ledger: endpoint, page, route	SHIPPED	11 files · +1,702
31-Aug	0a34cf34	DML-1 — defects found by the adversarial review fixed	SHIPPED	4 files · +496 –119
01-Sep	6e495e51	A date-dependent expense test fixed after the month rolled	FIX	1 file
01-Sep	29976186	SHT-1 — four dead sheets retired instead of migrated	SHIPPED	21 files · –435
01-Sep	1ac77b39	APR-1 — who approved, in a column, on every path	SHIPPED	13 files · +491
01-Sep	f0a4af42	Rulings recorded; storage-split questions closed	DOCS	2 files
02-Sep	7aef20fb	Approvals vs the floor — business-use audit of every approval system	ANALYSIS	353 lines
02-Sep	6d5a8342	RET-3 — an approved return credits the buyer at the booked rate	SHIPPED	10 files · +502
04-Sep	69ab92f8	RET-4 — the return card: customer, bale, thans, date, condition, photo, one dual-admin request	SHIPPED	25 files · +3,646
05-Sep	d38fccfe	DDC-1 — Daily Details Card proposal	PROPOSAL	389 lines
08-Sep	1347af43	Rule 17 recorded — expenses keep ₦; sale invoices and Inventory outputs go bare	RULING	1 file
08-Sep	d41d4e0a	Where the customer-payment door stands — state of play	ANALYSIS	497 lines
08-Sep	f681c739	CUR-1 — the cumulative currency-display plan	PROPOSAL	721 lines
08-Sep	464b9f7b	CUR-1 — the two-variable ruling: the second variable is a rate multiplier	RULING	2 files
08-Sep	da59be6e	CUR-1 — rulings closed as recommended; no multiplier means unconverted	RULING	2 files

09-Sep	5f854d60	CUR-2 — invoice multiplier layouts drawn for the owner's go	PROPOSAL	596 lines
09-Sep	c8379328	CUR-1 step 1 — invoice brief and mockups follow rule 17	SHIPPED	5 files
09-Sep	ae56422a	CUR-1 step 2 — money module, shims, multiplier setting, frozen invoice column	SHIPPED	11 files · +842
09-Sep	dd873dc7	CUR-1 step 3 — the expense side pinned, outputs byte-identical	SHIPPED	10 files · +340
09-Sep	92f44400	CUR-2 — the customer invoice: bare figures, multiplier frozen at issue	SHIPPED	5 files · +782
09-Sep	5d46383d	CUR-1 step 5 — the sales and inventory side prints a bare number	SHIPPED	39 files · +803
09-Sep	ecb9d3e2	CUR release A — rules, specs, register, settings table	DOCS	9 files
09-Sep	8aa96036	CUR-2 — the factor is internal; the caption no longer names it	SHIPPED	5 files
09-Sep	59d8a5af	CUR-1 step 7 — the controller prints sale-side money bare	SHIPPED	2 files · +376
09-Sep	4cabaa95	CUR-2 — the wizard asks for the customer-copy multiplier; wizard money bare	SHIPPED	6 files · +741
09-Sep	15a78a5d	CUR-1 step 9 — currency shims removed; lint fails on any naira leak	SHIPPED	4 files · -115
09-Sep	33d32aa6	CUR release B — specs, register, settings table, edit-bale test PDF	DOCS	4 files

2 · What each feature does

ANCH-1 · Wizard card follows the keyboard

When an admin types a reply into the confirm-sale wizard, the card used to stay above the reply. Now a buried card is deleted and re-sent at the bottom (keyboard stripped if Telegram refuses the delete). The same rule was applied to the RET-4 return card after a typed reply or photo.

DML-1 · Design Movement Ledger (/movement)

A web page per design and warehouse: opening balance, receipts, sales, transfers, returns and the counted gap from stock takes, replayed from BaleMovements and Inventory. Gaps are stated in packaging, never invented in yards. Hints point at late-logged movements. Manager access is warehouse-scoped.

SHT-1 · Storage split, step 1

The workbook is split into sheets that stay (raw business records) and sheets that move to Railway Postgres. Four dead sheets (Stock_Ledger, UserPrefs, ShipmentEvents, BankFeed) were retired in code; the bootstrap can no longer recreate them. Owner still has to delete the tabs.

APR-1 · Approver column

ApprovalQueue gained column H, Approver. Every path that resolves a request — single admin, dual admin, transfer receipt, supply accept, boot sweep, task withdrawal — stamps who signed,

and the requester is told by whom.

RET-3 · Returns credit the buyer

Every return approved since returns went behind approval had credited the customer ~~to~~ the executors emitted the ledger event without a rate. The credit now uses the request's rate, else the sold row's price, posts through the reporting emitter, and says what it credited. A read-only script lists past uncredited returns for the backfill ruling.

RET-4 · Return goods card

Customer-first: who is returning → which bale → tick the thans → returned on → condition → optional photo → confirm. One dual-admin return_thans request; the requester cannot sign. The executor flips each than in the warehouse it was sold from, dates the movement, credits per than at the booked rate, forwards the photo to both signers.

CUR-1 · Currency display (releases A and B)

Rule 17: expenses keep ~~to~~ everywhere; sale invoices and Inventory-changing outputs print a bare number. One money module (expense → ~~to~~12,345 · sale → 12,345 · saleRate → 1,450/yd), ≈300 sites swept across flows, services, cards, the wizard and the controller; the daybook and trial balance kept as today by ruling; old formatters removed; a smoke lint fails the run if a naira symbol reaches the sales side or an expense file loses its own.

CUR-2 · Invoice rate multiplier (releases A and B)

Two variables: CURRENCY is the accounting unit every rate is entered and booked in; a multiplier converts the entered rate for the customer copy of the invoice. The factor is chosen in the wizard's Step 5 (No multiplier · Settings value · type) or from Settings, frozen in the new trailing Invoices column at issue, and the document is rendered from stored base lines × stored factor. The sheet, ledger and Transactions never hold a multiplied figure. The factor is internal: shown only while entered, never on the document, caption, replies or cards.

3 • Analyses and proposals written

DOCUMENT	WHAT IT SETTLES
docs/APPROVAL_BUSINESS_AUDIT_2026-09-01.md	Eight business scenarios traced through every approval system; 74 findings, 27 verified twice. Led to RET-3 and RET-4.
specs/DDC-1_DAILY_DETAILS_CARD.md	The owner's Daily Details Card sketch mapped to the code: expenses reusable, sales per city new, outstanding per city barred by rule 15b. Fifteen rulings await.
docs/CUSTOMER_PAYMENT_D00R_2026-09-08.md	Where recording a customer payment stands: eight doors, one that books, no receipt or reference slot, sale-time cash double-count risk, fourteen questions.
specs/CUR-1_CURRENCY_DISPLAY.md	Every money-printing site (498) classified under rule 17, the mechanism, tests, and the nine-step build. Shipped.
specs/CUR-2_INVOICE_MULTIPLIER.md	The invoice and wizard drawn in both states on one worked example (3.20/yd entered; $\times 1,250 = 4,000.00/\text{yd}$). Shipped.

4 • Owner rulings recorded in BUSINESS_RULES

RULE	RULING
§6b / §6c	Bale, Than, Bundle defined; packaging wins the display word (Option A).
§6d (RET-3, RET-4)	An approved return credits at the booked rate; the return card carries date, condition, photo; dual-admin kept.
APR-1 / SHT-1	Who approved is a column; four dead sheets retired; storage split order recorded.
§17 (08-Sep)	Expenses keep ₦; sale invoices and Inventory-changing outputs print a bare number; unit via the Railway variable.
§17 amendment (08-Sep)	Two variables: the second is a multiplier on the entered rate for the customer copy; landed cost follows variable one.
§17 amendment (09-Sep)	Internal calculations use the base figures only; the multiplier is stored separately; the factor is never shown after entry.

5 • Owner steps outstanding

- CUR-1 / CUR-2 live check (both releases): approve a sale with Step 5 = Settings value, open the invoice link and PDF, compare with the base figures on the reply and statement; a second sale with No multiplier; blank the cell and confirm the first invoice does not change. Then side A (one expense, the 20:00 report, one payment request, one incentive — all ₦) and side B (Stock Value, Check Stock, catalogue, Return goods card, /balance — all bare).
- Approve the rule 17 closing sentence verbatim (marked PENDING in BUSINESS_RULES).
- RET-3: run `node scripts/list-uncredited-returns.js` and rule on the backfill. RET-4: one live return end to end; three open questions in the spec.
- DML-1: open one clean design and one with a known discrepancy at /movement.

5. SHT-1: delete the four retired tabs from the workbook. Confirm Railway Postgres snapshots are on. Give the go for the offsite backup job.
6. DDC-1: seed the Locations sheet, set Users.branch to Kano or Lagos for every expense filer, answer the fifteen rulings.
7. Customer-payment door: answer the fourteen questions before the Record Payment tile is built.
8. Settings: REMINDER_HOURS_ADMIN and DIGEST_APPROVALS=1 so approval reminders run.

Appendix · Earlier commits in the same session (10-Aug to 30-Aug)

Index only, straight from git. Each has its own spec or doc in the repo.

DATE	COMMIT	SUBJECT
2026-08-10	a9b8da21	CARD-3: say each noun once on the approval card, and drop the boilerplate reason
2026-08-10	7efe0e65	SELL-K1: the Kano than sale asks for seller, date and bill - like Lagos does
2026-08-12	6f973425	TIME-1: audit of every surface showing UTC or server-clock times
2026-08-13	8d7bacf5	TIME-1a: one Lagos-aware door for instants (fmtDate.withTime, lagosDay, lagosDayPlus)
2026-08-13	67bf4a68	TIME-1b + CARD-3: the clocks that were an hour early every single day
2026-08-13	a6e7c881	TIME-1c: stop stamping business dates from the UTC clock
2026-08-13	16396870	TIME-1d: fix six regressions the adversarial review found in the TIME-1 diff
2026-08-13	3ffffbae	CNET-2: the approving admin routes a new contact - customer, phonebook, or network
2026-08-13	82d72a6d	INV-SEND: research for sending the invoice PDF to the customer (parked, low priority)
2026-08-13	c78724a4	BKD-1: sale-date calendars reach 6 months back, as a Settings knob
2026-08-13	6f51a4f7	WAU-4: the audit recognises a bale counted as its own pieces
2026-08-14	d574da7b	LOC-1 + SLC-1: a register of places, and sales chips that follow the transfer rule
2026-08-14	b7a4a696	VRF-2: the bill check is warehouse supply's, not a store's
2026-08-14	186c61c8	SDN-2: the sheet's display format stops deciding what the bot reads
2026-08-14	980875fa	CAT-P1: a design's catalogue can have pages
2026-08-14	946dd0f4	Sheet audit 14-Aug: cell-level findings, owner rulings, fix queue
2026-08-14	cdbbaadb	SHEET-FIX-1: stop appends walking right across the sheet
2026-08-14	3b9ddd5	SHEET-FIX-2/3: repair the stranded contacts, stop phones losing their +
2026-08-14	6d74e40a	IDR-1/2: one identity register, and a card that can place a customer
2026-08-14	9fb2b5a8	Session close-out: pause state recorded where the next session looks
2026-08-14	20497af6	Audit doc: record the owner's batch-label convention
2026-08-14	5d982dc3	PAY-1 spec: every ruling locked, build assigned to the next session
2026-08-14	fda01776	PAY-1: payment requests — registered payees, dual admin, one finance hand
2026-08-15	c989f809	PAY-1: surface Payments to everyone, not to a department CSV
2026-08-15	5ae817a6	PAY-1: printable live-test script for Abdul and the Office phone
2026-08-15	0f802d9e	VRF-3 spec: bill check keys on the goods — locked, build on "go"
2026-08-15	7b09b8dc	VRF-3: the bill check needs a bale to check
2026-08-15	759d91d4	VRF-3 spec: record the trade-off the review surfaced
2026-08-16	25ed0eb4	CON-1 spec: one person-door, locked for the Opus 5 build
2026-08-16	7ee266a5	CON-1: one door adds a person, and it asks what kind first
2026-08-16	b429d3a1	CLAUDE.md: CON-1 shipped — one person-door, type honoured at approval
2026-08-16	9ce6a483	PAY-1: make the two-admin gate real, not just documented
2026-08-16	ee6828a9	RMV-1 Phase A: make "inactive" mean one thing
2026-08-16	5dfca04d	RMV-1 Phase B: the removal itself, behind two real admins
2026-08-17	dfb1ab67	RMV-1: park the remaining work as a low-priority to-do (owner order)
2026-08-18	2419a844	MNU-1 plumbing: anchor tracking, update dedupe, no silent taps
2026-08-18	d78c2d8f	MNU-1: route every menu through one anchor-aware renderer
2026-08-18	9968f326	MNU-1: a permanent way in, and a menu that stops moving

2026-08-18	a1644a87	WEB-1: put the dense approval list on the website, where a table belongs
2026-08-18	77e647ec	MNU-1/WEB-1: record the doctrine and the owner's flip step
2026-08-20	8c676799	SUB-1: one submit, one request, however many times the trigger fires
2026-08-21	db06b281	SDS-3 spec: than-first Stock-by-Shade card, layout locked by the owner
2026-08-21	b07c3146	SDS-3: the shade card counts thans where bales are opened
2026-08-21	280e4ea4	IDR-3: a stranger's later messages edit the card, they don't spawn new ones
2026-08-21	590cb360	SDS-3 follow-through: the flow's own notes now describe the card it draws
2026-08-22	8d1ecf40	ANL-2: the usage data tells the truth before the owner flips it on
2026-08-22	fb1a7b84	SUPQ-1: the Sales Workflow tile becomes 🚧 Pending Supply, the goods-owed queue
2026-08-22	709fa28c	digest: the unaccepted-orders counter counted a status nobody writes
2026-08-22	4e7206d5	docs: what a bank entry actually does, and every automation around money
2026-08-23	d71349d0	PTK-1 spec: the photo IS the task card
2026-08-23	611a1757	DSN-1: the design-system kit, staged for Claude Design sync
2026-08-23	13a0a953	MYP-1 design finalized: linked people, one product view, one governed matrix
2026-08-23	507d38e9	PTK-1: a photo of a task note becomes an assigned task
2026-08-23	8ae1975c	MYP-1: linked people, one product view, one governed matrix
2026-08-23	de976c73	STK-PRIV: live stock counts are admin-only on every product surface
2026-08-23	5b6de675	STK-PRIV: re-gate every allocate tap; stock figures leave the documents
2026-08-23	e758847a	MYP-2: allocation-only My Products; shade taps raise real supply requests
2026-08-23	3d5276ca	tests: two fixtures used the UTC day where the code uses the Lagos day
2026-08-23	ab0f1aca	ALC-1: the signed-off Allocation Matrix, wired to live data
2026-08-24	67d384cc	SUP-2: close two cross-customer disclosure paths in the customer login
2026-08-26	1dc8a185	TSK-V2: salaried work commits time, not a deadline; the chart is tap-only
2026-08-26	d4a94b99	GNT-1: the employee work plan at /gantt, wired to the live task feed
2026-08-26	59fc205c	TSK-FIX: retire the route that lost bonuses; two digest defects
2026-08-26	be157cab	TSK-V2 fixes: a crash on the primary path, and five wrong Gantt bars
2026-08-26	d2363ba3	GNT-2: session pages were 404 in production; the reporting selection
2026-08-26	8c2709ec	TSK-V3: Team Tasks becomes a paged chip list (admin view)
2026-08-27	34fb07b4	IDR-4: the Pending Users queue, and onboarding that links itself
2026-08-27	9961df97	MKR-3: marketer photos are optional
2026-08-27	42bb51c2	ALC-2: the allocation sheet shows STOCK and FREE, two taps deep
2026-08-27	2ea7d409	ALC-3: a pinned person's sheet shows every design, and FREE gets one scope
2026-08-27	16bb0756	PIN-1: admin warehouse pin on the identity register
2026-08-27	ec273167	LNK-1: dashboard buttons open the browser directly (login_url)
2026-08-27	009b3610	Pending list: LNK-2 (one-tap reports) queued as next-up
2026-08-28	f44b22eb	MYP-3: "My Products" becomes their own named Collection
2026-08-29	a211bc0e	TRM-1: automatic task reminders, armed by two admins
2026-08-29	da84937a	Approval cards: escape plain-text cards at the inbox, the one Markdown consumer
2026-08-30	0c78c00d	CARD-5b: the invoice speaks the item's own packaging too
