

Payments live test — Admin guide

For the two admins — the Owner and Admin 2. Both of you get the same cards; the guide marks what only the **first signer** or only the **second signer** sees. Decide between you who signs first; the owner may be either.

Date: **09-Sep-2026** · Telegram: **Black Panther_Bot** · Two taps per request, then waiting

The one payment everyone is testing

Mr. Abdul (Operations Officer) asks for **₹4,000** into **OPAY 7048940378**, reason **Transport to Idumota**, with a photo of the bill.

The Owner signs first, **Admin 2** signs second. A payment needs two *different* admins when two are set up; if the Owner is the only admin, his one approval completes it. The person who asked can never sign his own.

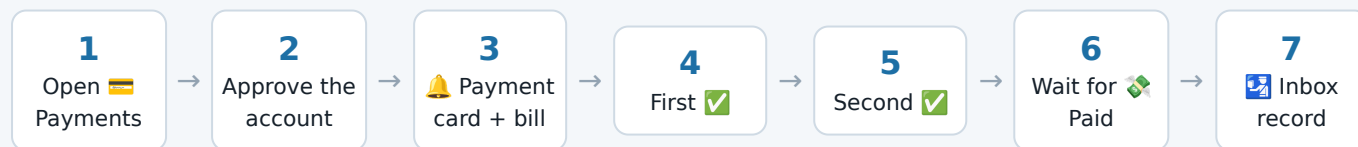

The Office phone (finance) pays by hand in the bank app, taps ✓ **Mark Done**, then sends the screenshot.

In this guide the first signer is the **Owner** and the second is **Admin 2**. Swap the names if you decide the other way round.

Before you start

- Both of you have been set up by the owner as admins of the bot. With only **one** admin there, a single signature would be enough and the test proves nothing.
- Both of you have sent **/start** to the bot.
- The finance seat is set: open  Payments and check the last line reads **Finance: Office pays and marks done**. If it shows a  warning instead, stop — see step 1.
- Neither of you raises the test request — an admin who asks counts as his own first signature and is left off his own card.
- The bot's bank list includes **OPAY** (the owner adds it), or the Operations Officer cannot register the example account.
- Agree who is the first signer. The second signer must wait for the pointer message (step 6) before tapping.

The whole job at a glance

How to read the pages that follow. The dark bubbles are exactly what the bot prints. **Do:** is what you tap or type. **You receive:** says what should land on your phone at that moment and who it comes from. Tick ☐ **matches** when it does. A grey number means you only wait at that step. A **small grey pop-up** is the short note Telegram shows for a moment after a tap, then hides.

Part A · Check the seat, then approve the Operations Officer's account

1 Open Payments and read the Finance line

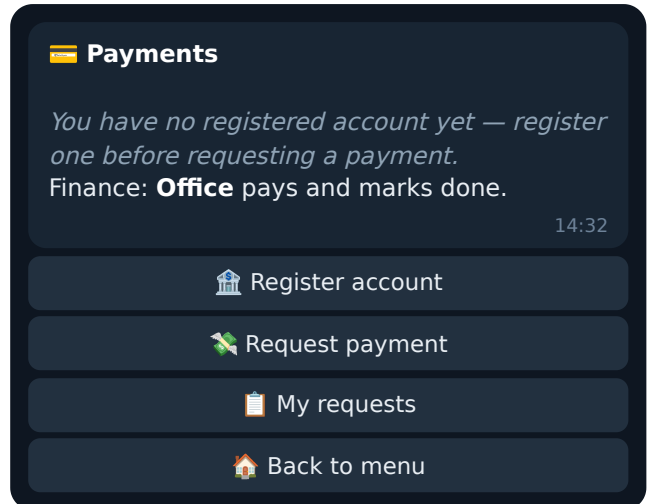

Do: send /menu and tap  **Payments**. An admin's card has one extra line at the bottom naming the finance seat.

You receive: the Payments card ending **Finance: Office pays and marks done.**

If the last line is  *No one is in the Finance department yet — this is with all admins until the Users sheet names exactly one finance person.* or  *2 people are in the Finance department. One finance ID makes payments — fix the Users sheet; meanwhile this is with all admins.,* the finance phone has not been set up by the owner. Every finance card would go to all admins instead of the Office phone. Fix it before going on.

☐ matches

the bot, on an admin's phone

2 Register payment account — both admins get this card

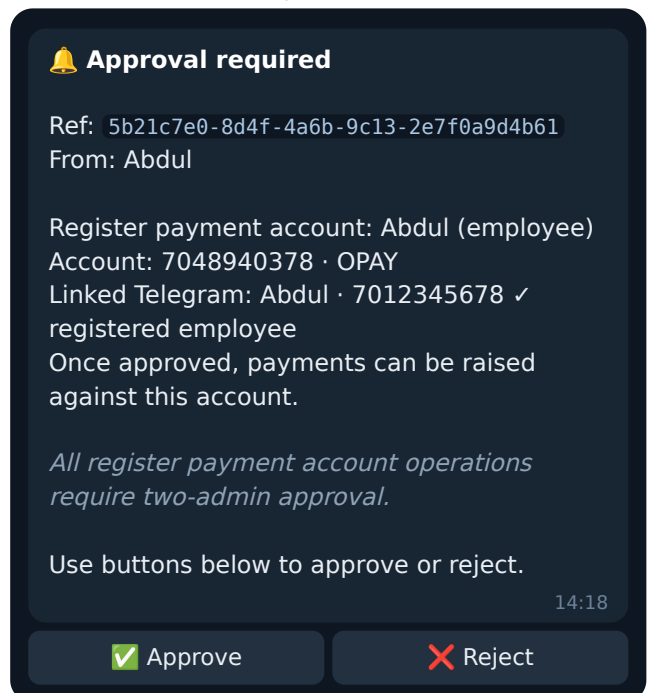

Do: read it. The **first signer** taps  **Approve**. The **second signer** waits for the pointer message, then taps  **Approve** on **his own** card (it still has its buttons).

You receive: the  Approval required card for **Register payment account: Abdul (employee)**, with the linked Telegram line ending  *registered employee*.

The messages around the two signatures are exactly the ones in Part B, steps 5-8 — read those once and you know both.

☐ matches

the bot, on BOTH admins' phones

3

After the second signature on the account

Nothing to do — nothing more. The second signer's card loses its buttons and one line follows.

You receive: ✓ “Request ... approved by Owner + Admin 2. Changes applied.” — **only that line.** The bot does not add an “Account registered for Abdul” line; that is known and not a fault. The first signer hears nothing at this moment.

If the bot says something else:

- ⚠ *Approved but execution failed: Not registered:* `<message>` — the Operations Officer is not on the Users list as active staff. Fix the Users list, ask him to register again.

☐ matches

the bot, on the *SECOND* signer's phone

✓ Request 5b21c7e0-8d4f-4a6b-9c13-2e7f0a9d4b61 approved by Owner + Admin 2. Changes applied.

14:22

Part B · The payment request — two signatures

4 **Payment request card, then the bill photo**

Nothing to do — nothing yet — read it. Both admins get the same card, and right after it the bill as a separate photo.

You receive: the  card with **Reason: Transport to Idumota** and **Bill: attached**, then the photo captioned  *Bill for payment request*

For ₦50,000 and above the card carries  **LARGE PAYMENT** — *above the threshold*. Two other lines can appear on real requests: a first line  **Possible duplicate** — *same request also pending as ...* (approve ONE, reject the rest), and  **Reminder** — *this approval is still waiting on a re-sent copy*.

☐ **matches**

the bot, on BOTH admins' phones

 **Approval required**

5 Another door — the Approvals inbox

Do: optional: open  **Approvals inbox** →  **Payments** → tap the row → the item card.  **Approve** here is the very same signature as on the card in your chat with the bot;  **Bill** re-sends the bill photo.

You receive: the same lines as the card in your chat with the bot, ending *Requested by Abdul · today · R-9DDC*. After the first signature the card gains  *1 of 2 approvals already given — a different admin must give the second*.

Use whichever door you like — the card in your chat with the bot, or the inbox — every message below is identical.

6 First signature — the Owner taps Approve

Do: first signer only: tap  **Approve** once. Your card's buttons disappear; a small grey pop-up shows for a moment; a plain message follows.

You receive: a small grey pop-up  **Approval 1 of 2 recorded.**, then the message “ Request ...: your approval is recorded (1 of 2). Waiting for a second admin.” At the same moment the Operations Officer is told *signed by Owner*.

If the bot says something else:

- alert  *You already gave the first approval — a different admin must give the second.* — you tapped a second time (or a copy in the inbox). Harmless.
- alert  *You cannot approve your own request — a second admin must review it.* — this is your own request; the other admin must sign.
- alert *Only admins can approve.* — the phone tapping is not an admin.

☐ matches

the bot, on the FIRST signer's phone

 Approval 1 of 2 recorded.

 Request 9ddc4b7e-2f1a-4c58-9e0b-7a1d3c5f2b84: your approval is recorded (1 of 2). Waiting for a second admin.

14:40

7

The pointer — Admin 2 is told to sign

Do: second signer only: you get a plain message, **not** a new card. Scroll up to your original 🛎 Approval required card — its buttons are still live — and tap ✅ **Approve** there (or use the inbox).

You receive: 🛎 “Request ... (request payment) has its first admin approval and needs a SECOND. Use the approval card in your chat.”

The first signer's own card has no buttons now; the second signer's card does. If you cannot find it, open 📁 Approvals inbox → 💰 Payments.

☐ matches

the bot, on every OTHER admin's phone

🛎 Request 9ddc4b7e-2f1a-4c58-9e0b-7a1d3c5f2b84 (request payment) has its first admin approval and needs a SECOND. Use the approval card in your chat.

14:40

8

Second signature — Admin 2 taps ✅ Approve (one message, two lines)

Do: second signer only: tap ✅ **Approve**. A small grey pop-up *Approving...*, your buttons vanish, and **one** message with **two lines** follows.

You receive: one message. Line 1: “✅ Request ... approved by Owner + Admin 2. Changes applied.” Line 2: “✅ Payment of ₦4,000 to Abdul approved by Owner || Admin 2 — now with finance to pay.” The Operations Officer gets the same two lines in one message; the Office phone gets the finance card.

If the bot says something else:

- ⚠ *Approved but execution failed: <message>* — signed, but the record could not be written. Tell the owner.

☐ matches

the bot, on the SECOND signer's phone

Approving...

✅ Request 9ddc4b7e-2f1a-4c58-9e0b-7a1d3c5f2b84 approved by Owner + Admin 2. Changes applied.
 ✅ Payment of ₦4,000 to Abdul approved by Owner || Admin 2 — now with finance to pay.

14:45

9

The first signer at this moment

Nothing to do — the Owner receives **nothing** at the second signature — that is how it is built. He hears the outcome at 💰 Paid (step 10) or at a decline (exit B). If he taps his old card anyway:

You receive: nothing, unless you tap: then a small grey pop-up **Already approved — nothing to do.** and “ Request ... was already approved on ... — no change made.”

☐ matches

the bot, only if the FIRST signer taps a stale card

Already approved — nothing to do.

 Request 9ddc4b7e-2f1a-4c58-9e0b-7a1d3c5f2b84 was already approved on 09-Sep-2026 — no change made.

14:46

Part C · Both signers wait for finance

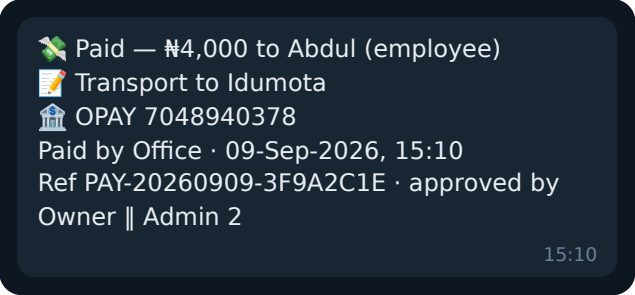

10 **Paid — when the Office phone taps ✓ Mark Done**

Nothing to do — both signers receive the Paid notice at the moment finance marks the payment done — **before** any screenshot. It is the same plain text the Operations Officer gets.

You receive:  Paid — amount, reason, account, **Paid by Office · date, time**, the PAY number and **approved by Owner || Admin 2**.

☐ matches

the bot, on BOTH signers' phones and the Operations Officer's

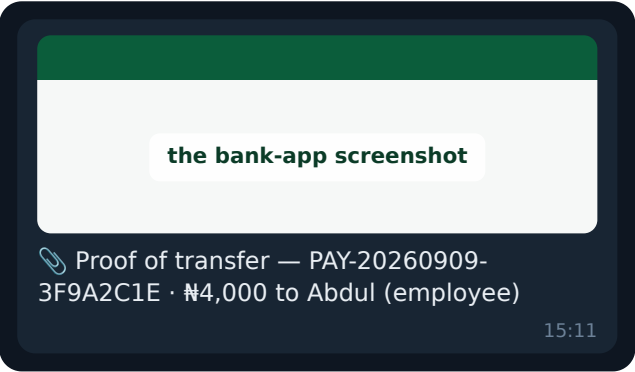

11 **Proof of transfer — only if finance sends one**

Nothing to do — if the Office phone sends the bank screenshot, both signers receive it as a photo with this caption, **after** the Paid notice. If finance skips, nothing more comes.

You receive: the screenshot captioned “ Proof of transfer — PAY-... · ₦4,000 to Abdul (employee)”.

☐ matches

the bot, after finance sends the screenshot

12 Inbox — the record after it is paid

Do: open  **Approvals inbox** →  **Payments** → the item. A resolved request opens as a **record**: no decision chips, one status line read live from the payment records.

You receive: the request lines, then  *Already approved · date — no action needed.* and  **Paid by Office · date, time · PAY-....** Tap  **Bill** to get the bill again.

Between the second signature and Mark Done the last line reads  **With finance to pay**. After a decline:  **Declined by Office · reason**. After a reject the header turns  *Already rejected ...* and the line reads  **Rejected by Owner** — or  **Rejected by Owner + Admin 2** if the reject came after the other admin's first signature.

 **matches**

 Close

The two exits · run one of each after the first payment

A

✖

Reject — any ONE admin, before approval

Do: on a fresh request (the Operations Officer raises one), **one admin** taps **✖ Reject** on the card in your chat with the bot or in the inbox. The bot asks for no reason. **For this test, reject before either admin has signed** — that keeps the record line below exactly as printed.

You receive: a small grey pop-up **Rejecting...**, your card's buttons vanish, then “**✖ Request ... rejected.**” The Operations Officer gets “**✖ Your request R-... has been rejected by admin.**” **The other admin is not told** — even if he gave the first signature — and finance gets nothing (no finance card ever existed). The inbox record reads **✖ Rejected by Owner.**

If the reject follows the other admin's first signature, the record names both: **✖ Rejected by Owner + Admin 2** (first signer + rejecter). That is why the test rejects before any signature.

If the bot says something else:

- ⚠ *Rejection failed: <message>* — tell the owner.

☐ matches

Rejecting...

✖

Request 9ddc4b7e-2f1a-4c58-9e0b-7a1d3c5f2b84 rejected.

14:32

B

✗ Decline — by finance, after both signatures

Nothing to do — on another fresh request, both of you sign as in Part B; then the Office phone taps ✗ **Decline** and types a reason. **Both signers** receive the decline notice — the same text as the Operations Officer.

You receive: ✗ “Payment declined — ₦4,000 to Abdul (employee) was not paid.” with the reason line and **Declined by Office · date, time;** the inbox record ends ✗ **Declined by Office · reason.**

☐ matches

the bot, on BOTH signers' phones and the Operations Officer's

Checklist · every message the admin should see, in order

Tick each one as it arrives. The order matters — it is part of what is being tested.

When	What arrives
☐ Step 1	 Payments card ends Finance: Office pays and marks done. (no  line)
☐ Step 2	 Approval required — Register payment account: Abdul (employee) ... ✓ registered employee (both admins)
☐ Step 2 · first signer	pop-up  Approval 1 of 2 recorded. +  Request ...: your approval is recorded (1 of 2). Waiting for a second admin.
☐ Step 2 · second signer	 Request ... (register payment account) has its first admin approval and needs a SECOND. Use the approval card in your chat.
☐ Step 3 · second signer	✓ Request ... approved by Owner + Admin 2. Changes applied. (no “Account registered” line — expected)
☐ Step 4	 Approval required — Payment request: ₦4,000 ... Reason: Transport to Idumota · Bill: attached (both admins)
☐ Step 4	photo:  Bill for payment request ... (both admins)

When	What arrives
☐ Step 5	 inbox:  Payments — 1  today →  09 Sept · request payment · Abdul → item card with  Bill
☐ Step 6 · first signer	pop-up  Approval 1 of 2 recorded. +  Request ...: your approval is recorded (1 of 2). Waiting for a second admin. — buttons gone
☐ Step 7 · second signer	 Request ... (request payment) has its first admin approval and needs a SECOND. ... (no new card)
☐ Step 8 · second signer	pop-up Approving... · buttons gone · ONE message, two lines:  Request ... approved by Owner + Admin 2. Changes applied. ↩  Payment of ₦4,000 to Abdul approved by Owner Admin 2 — now with finance to pay.
☐ Step 9 · first signer	NOTHING arrives at the second signature (a tap on the old card: pop-up Already approved — nothing to do.)
☐ Step 10 · both	 Paid — ₦4,000 to Abdul (employee) ... Paid by Office · date, time ... approved by Owner Admin 2
☐ Step 11 · both	 Proof of transfer — PAY-... (photo) — AFTER the Paid notice; nothing if finance skipped
☐ Step 12	 inbox record:  Already approved · ... +  Paid by Office · date, time · PAY-...
☐ Exit A · rejecter	pop-up Rejecting... +  Request ... rejected. (other admin: nothing) · inbox record:  Rejected by Owner — rejected BEFORE any signature
☐ Exit B · both	 Payment declined — ... was not paid. + reason + Declined by Office · date, time

If anything differs, screenshot it and send it to the owner.

Include the whole card — the time on it and the buttons under it. A wrong word, a missing line or a message that arrives in the wrong order all count.
