

Payments live test — Finance guide

For the **Office phone** — the finance seat that pays by hand and marks each payment done. This phone has been set up by the owner as the finance phone; nobody else can tap ✓ Mark Done or ✕ Decline.

Date: **09-Sep-2026** · Telegram: **Black Panther_Bot** · Nothing to do until both admins have signed

The one payment everyone is testing

Mr. Abdul (Operations Officer) asks for **₦4,000** into **OPAY 7048940378**, reason **Transport to Idumota**, with a photo of the bill.

The Owner signs first, **Admin 2** signs second. A payment needs two *different* admins when two are set up; if the Owner is the only admin, his one approval completes it. The person who asked can never sign his own.

The Office phone (finance) pays by hand in the bank app, taps ✓ **Mark Done**, then sends the screenshot.

In this guide the finance seat is called **Office** — that is the name the bot prints on the Paid notice.

Before you start

- The owner has set this phone up as the finance phone and restarted the bot. Without that the finance card goes to the admins, not to you.
- This phone is an allowed bot user (an active row on the Users list). If the bot answers *You are not authorized to use this bot.* to anything, stop and tell the owner.
- You have sent **/start** to the bot.
- Open 🇳🇮 Payments once now: the button **Waiting for me to pay (0)** must be there. It only shows for the finance seat — that is how you know the seat is set (step 1).
- The bank app is on this phone and ready — the payment itself is made **outside** the bot, by hand.
- Have a way to take a screenshot of the transfer; the first test payment sends the proof, the second skips it.
- This phone need not be an admin. If it is, it will also receive the 🔔 approval cards — ignore those; they are the admins' job.

The whole job at a glance

How to read the pages that follow. The dark bubbles are exactly what the bot prints. **Do:** is what you tap or type. **You receive:** says what should land on your phone at that moment and who it comes from. Tick ☐ **matches** when it does. A grey number means you only wait at that step. A **small grey pop-up** is the short note Telegram shows for a moment after a tap, then hides.

Part A · The seat, the card, the payment

1 Open Payments — check the seat is yours

Do: send `/menu` and tap  **Payments**. Look for the button  **Waiting for me to pay (0)**.

You receive: the Payments card with the extra  **Waiting for me to pay** button. The number in brackets is how many approved payments are waiting — 0 before the test.

No  Waiting for me to pay button? This phone has not been set up by the owner as the finance phone. Stop and tell the owner — the finance card would go to the admins instead.

☐ matches

the bot, on the Office phone

2 The finance card arrives — as the caption on the bill photo

Nothing to do — nothing to tap yet — read every line. It comes the moment the second admin signs. When the request had a bill, the card is the **caption of the bill photo**; without a bill it is a plain text card.

You receive: the photo with the  Payment caption: payee, account, **₦4,000**, reason,  *Bill attached*,  **Approved: Owner || Admin 2**, *Raised by Abdul · date, time*, the PAY number — and two buttons,  **Mark Done** and  **Decline**.

For ₦50,000 and above the amount line also carries  *large payment*. If you leave a card untouched for 4 hours the bot re-sends it unchanged — a reminder, not a second payment.

If the bot says something else:

- a line  *No one is in the Finance department yet — this is with all admins until the Users sheet names exactly one finance person*. at the bottom — the seat is not set; the same card went to every admin. Tell the owner.

☐ matches

the bot, on the Office phone, right after the second signature

3 Pay by hand in the bank app

Do: open the bank app and transfer **₦4,000** to **OPAY 7048940378** (for the test, use whatever the owner tells you — a real transfer or a pretend one). Take a screenshot of the transfer. **Do not tap anything in the bot until the money has gone.**

You receive: nothing new — the bot waits. The card's buttons work for as long as the payment is unpaid, even days later.

☐ matches

the same card, still waiting on your phone

4 Tap ✓ Mark Done

Do: tap ✓ **Mark Done** on the finance card. A small grey pop-up shows *Marked done.*, the card's buttons disappear, and a new card asks for the proof.

You receive: a small grey pop-up **Marked done.** → buttons gone on every copy of the card → the **Proof of transfer?** card.

The order matters and is part of the test. At the moment you tap ✓ Mark Done — before you send anything — Abdul, the Owner and Admin 2 each receive the plain-text **Paid** notice (drawn in step 5). The proof you send next is a separate follow-up. Ask them to confirm the Paid notice came in before the screenshot.

If the bot says something else:

- alert *Only the finance person marks a payment done.*
- alert *That payment was not found.*
- alert *Already marked done.*
- alert *That payment is pending approval — it cannot be paid.*

☐ matches

the finance card, after your tap

Marked done.

the bot, a fresh card straight after

5

What the other three receive at your tap

Nothing to do — nothing for you to do. This is the notice the Operations Officer and both admins get at the same moment, so you know what they are checking.

You receive: nothing on this phone — the Office phone does not get its own Paid notice; your record is the  Paid card in step 6.

☐ matches

the bot, on Abdul's, the Owner's and Admin 2's phones

 Paid — ₦4,000 to Abdul (employee)
 Transport to Idumota
 OPAY 7048940378
Paid by Office · 09-Sep-2026, 15:10
Ref PAY-20260909-3F9A2C1E · approved by
Owner || Admin 2

15:10

Part B · The proof — send it, or skip

6 Send the screenshot (first test payment)

Do: while the  **Proof of transfer?** card is showing, send the bank screenshot as a photo (or a PDF as a File). A new  **Paid** card with  *Proof attached* arrives below; it has no buttons. The old  **Proof of transfer?** card stays on screen — its button no longer does anything (tapping it only says *That screen expired.*).

You receive:  **Paid** — ₦4,000 to Abdul · PAY-... · *Recorded date, time.* ·  *Proof attached*. The three others receive your screenshot with the caption  **Proof of transfer — PAY-... · ₦4,000 to Abdul (employee).**

☐ matches

a new card, sent straight after

what Abdul, the Owner and Admin 2 receive

7 ⏩ Skip — no proof (second test payment)

Do: on the second payment, tap ⏩ **Skip — no proof** instead. A new  **Paid** card arrives below without the proof line; the old  **Proof of transfer?** card stays on screen — its button no longer does anything (tapping it only says *That screen expired.*). **Nobody else gets anything** — the Paid notice at step 4 was their last message.

You receive: a new card:  **Paid** — ₦4,000 to Abdul · PAY-... · *Recorded date, time.* — no  line, and the new card has no buttons.

Leaving the proof card alone has the same effect as skipping: the payment is already marked done and everyone has already been told.

☐ matches

a new card, sent straight after

8 Waiting for me to pay — your queue

Do: open  **Payments** →  **Waiting for me to pay (n)**. Every approved-and-unpaid payment is a chip; tap one to get its finance card again (same card, same buttons). Use it when a card is lost in the chat.

You receive: the list with one chip per waiting payment — amount → payee · date · reason — or the *Nothing approved is waiting* line once every payment is paid or declined.

If the bot says something else:

- *That list is for the finance seat.* — the phone tapping is not the finance seat.
- *That list expired.* — an old list; open it again from  Payments.

☐ matches

the bot, while one payment is waiting

the same list when nothing is waiting

The two exits · what the finance seat sees

A Reject by an admin — you see nothing

Nothing to do — nothing. When an admin rejects a request before it is approved, no finance card is ever made, so this phone receives nothing at all. That is correct.

You receive: nothing.

☐ matches

for reference only — nothing arrives here

Payment request: ₦4,000
Payee: Abdul (employee)
Account: 7048940378 · OPAY
Reason: Transport to Idumota

(no finance card — the request was rejected before approval)

14:32

B Decline — you refuse to pay an approved request

Do: on a fresh request that both admins have signed (the owner will tell you which), tap  **Decline** on its finance card, then **type a reason** of at least 3 characters — for the test: **Account name does not match — send the OPAY name.**

You receive: the  **Decline ₦4,000 to Abdul** prompt; after your reason, a new  **Declined** card arrives below with your reason in grey and *The requester has been told*. The prompt stays on screen — its  Cancel button now only prints  *Cancelled*. and undoes nothing (the decline has already happened). Every copy of the finance card loses its buttons.

If the bot says something else:

-  *Give a reason — the requester needs to know what to fix.* — reason too short; type it again.
-  *Cancelled.* after  Cancel — nothing changed; the payment stays approved and waiting.
- alert *Only the finance person can decline a payment.*
- alert *That payment was not found.*
- alert *That payment is done — nothing to decline.*

☐ matches

the bot, after  Decline

 **Decline ₦4,000 to Abdul**

Why? The person who asked will see this, so say what would make it payable.

14:32

 Cancel

a new card, sent straight after

 **Declined** — ₦4,000 to Abdul

Account name does not match — send the OPAY name.

The requester has been told.

15:10

 Back to menu

B2 Who is told about the decline

Nothing to do — nothing more for you. Abdul, the Owner and Admin 2 each receive this plain-text notice with your reason.

You receive: nothing on this phone beyond the ✖ Declined card above.

☐ matches

the bot, on Abdul's, the Owner's and Admin 2's phones

✖ Payment declined — ₦4,000 to Abdul (employee) was not paid.

Checklist · every message the finance seat should see, in order

Tick each one as it arrives. The order matters — it is part of what is being tested.

When	What arrives
☐ Before	 Payments card has the  Waiting for me to pay (0) button
☐ Step 2	photo + caption  Payment — Abdul · employee ...  Approved: Owner Admin 2 ... PAY-... with [ Mark Done] [ Decline]
☐ Step 3	nothing arrives while you pay in the bank app
☐ Step 4	pop-up Marked done. → buttons gone on the finance card
☐ Step 4	 Proof of transfer? — Send a screenshot of the bank transfer, or skip. ₦4,000 → Abdul · PAY-...
☐ Step 4	(on the other three phones, at this same moment, BEFORE any screenshot)  Paid — ... Paid by Office · date, time
☐ Step 6	after the screenshot, a new card:  Paid — ₦4,000 to Abdul · PAY-... · Recorded ... ·  Proof attached — the new  Paid card has no buttons
☐ Step 6	(on the other three phones) photo captioned  Proof of transfer — PAY-... · ₦4,000 to Abdul (employee)
☐ Step 7	second payment,  Skip — a new card:  Paid — ... Recorded ... (no  line, no buttons on the new card); nothing more to anyone
☐ Step 8	 Waiting for me to pay: one chip per waiting payment, or Nothing approved is waiting ...
☐ Exit A	nothing arrives when an admin rejects
☐ Exit B	✖ Decline ₦4,000 to Abdul — Why? ... → a new card ✖ Declined — ... The requester has been told. (buttons gone on every copy of the finance card)
☐ Exit B	(on the other three phones) ✖ Payment declined — ... was not paid. + your reason + Declined by Office · date, time

If anything differs, screenshot it and send it to the owner.

Include the whole card — the time on it and the buttons under it. A wrong word, a missing line or a message that arrives in the wrong order all count.
