

Payments live test — Operations Officer guide

For the two Operations Officers who raise payment requests: each of you does every step of this guide on your own phone, with your own account and your own request.

Date: **09-Sep-2026** · Telegram: **Black Panther_Bot** · About 10 minutes of tapping, then waiting

The one payment everyone is testing

Mr. Abdul (Operations Officer) asks for **₦4,000** into **OPAY 7048940378**, reason **Transport to Idumota**, with a photo of the bill.

The Owner signs first, **Admin 2** signs second. A payment needs two *different* admins when two are set up; if the Owner is the only admin, his one approval completes it. The person who asked can never sign his own.

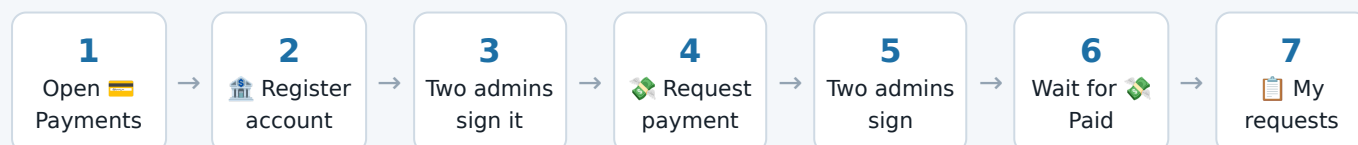

The Office phone (finance) pays by hand in the bank app, taps **✓ Mark Done**, then sends the screenshot.

In this guide the Operations Officer is called **Mr. Abdul**. Read your own name wherever it says Abdul.

Before you start

- The owner has put you on the Users list as an **active employee**. You are **not** an admin — if you were, you could not be a requester in this test.
- You have sent **/start** to the bot at least once, so it can message you.
- Your bank is in the bot's bank list. For **OPAY** the owner adds it first — if you do not see  OPAY at step 3, stop and tell him.
- Have the **bill photo** on your phone (any receipt or invoice picture will do for the test).
- Know your account number by heart — the bot asks for it **twice** and compares.
- If you already have an approved account in the bot, skip steps 2–5 and start at step 6.

The whole job at a glance

How to read the pages that follow. The dark bubbles are exactly what the bot prints. **Do:** is what you tap or type. **You receive:** says what should land on your phone at that moment and who it comes from. Tick ☐ **matches** when it does. A grey number means you only wait at that step. A **small grey pop-up** is the short note Telegram shows for a moment after a tap, then hides.

Part A · Register your account (once, before any payment)

1 Open Payments

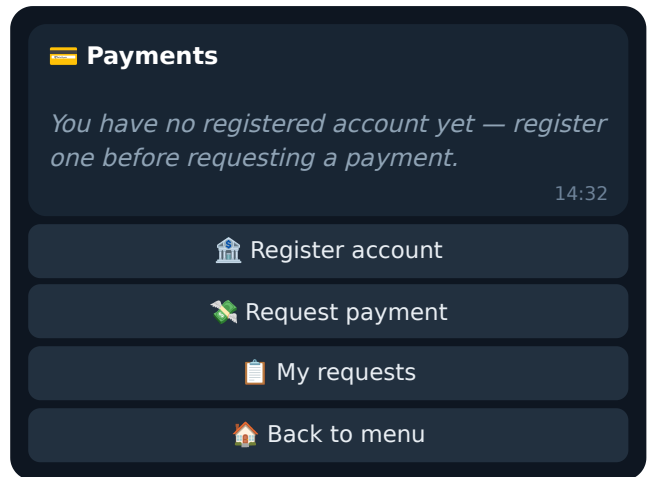

Do: send `/menu` (or `/start`) to the bot and tap the  **Payments** tile. It is on your first screen and also inside  Finance.

You receive: the Payments card. Because you have no account yet, the middle line says so in grey.

No  Payments tile? You are not on the Users list as active, or you are not allowed to use the bot at all (the bot would answer *You are not authorized to use this bot.*). Tell the owner.

☐ matches

the bot, on your phone

2 Tap Register account, then type your account number

Do: tap  **Register account**. The bot does not ask whose account — it is yours. Type **7048940378** (your own 10 digits).

You receive: the **Account for Abdul** card (your own name on it).

If the bot says something else:

-  *Nigerian account numbers are 10 digits — that was 9. — you typed the wrong number of digits; type all 10.*
-  *Enter the account number (digits only). — you sent something that is not a number.*

☐ matches

the bot, on your phone

3 Type it once more, then tap your bank

Do: type the **same 10 digits again**. When they match the bot shows the number in bold and asks for the bank — tap 🏦 **OPAY**.

You receive: first the **Type it once more** card, then the **Which bank?** card with the bank chips, two per row.

No 🏦 OPAY chip? The owner has not added OPAY to the bank list yet. Tap ❌ Cancel and tell him — do not pick a different bank for the test.

If the bot says something else:

- ⚠️ *The two did not match.* — the two numbers differ. That is the check working; type the number again, carefully.

☐ matches

the bot, after the first number

 **Type it once more**

An account number is the one thing here nothing else can check — so type it again and the bot will compare.

14:32

← Back ❌ Cancel

the bot, after the second number matched

 **7048940378**

Which bank?

14:32

 GTBank	 Zenith
 FirstBank	 Access
 UBA	 OPAY
← Back	❌ Cancel

4 Check and submit

Do: read the three lines. If they are right, tap ✅ **Submit for approval**. A new ⌚ **Sent for approval** card arrives below; the old card stays on screen — its button no longer does anything (tapping it only says *That screen expired.*).

You receive: the confirmation card. Two admins now get a card each on their own phones; you are told when each one signs.

If the bot says something else:

- ⚠️ *Already registered — OPAY 7048940378 is already registered and active for ...* — that account is already in the bot; nothing was submitted. Skip to step 6.
- ⚠️ *Could not submit: ...* — the bot could not reach the office records. Tell the owner; nothing was sent.

☐ matches

 Abdul

You'll be told when two admins have signed it.

14:32

🏠 Back to menu

5 Wait for the two signatures

Nothing to do — you will receive **two plain messages**, one after each admin signs. Nothing to tap.

You receive: first the 🗑️ “1 of 2 ... signed by Owner” message (the first signer's name is on it), **then** the ✅ “approved by admin. Changes applied.” message. After the second one your account is live.

The long code in brackets is the request number; the admins know it by its first four letters (here **R-5B21**). If it has not come by the end of the day, ask the owner — the request is waiting, nothing is lost.

☐ **matches**

the bot, when the Owner signs

🗑️ Your request (5b21c7e0-8d4f-4a6b-9c13-2e7f0a9d4b61) has 1 of 2 admin approvals — signed by Owner. One more to go.

14:20

the bot, when Admin 2 signs

✅ Your request R-5B21 has been approved by admin. Changes applied.

14:22

Part B · Ask for the ₦4,000

6 Open Payments → Request payment → pick your account

Do: open  Payments again (it now says *You have 1 registered account*), tap  Request payment, then tap the chip  Abdul · OPAY 7048940378.

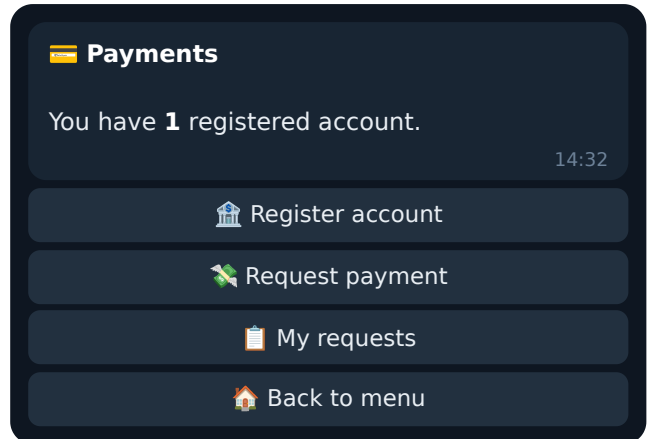

You receive: the **Pay into which account?** card with one chip: your approved account. You only ever see your own accounts.

If the bot says something else:

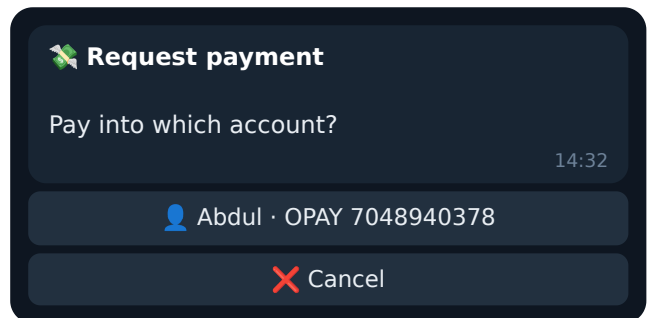

- *No approved account to pay into yet.* with a  Register account button — your account is not approved yet (or was rejected). Go back to step 5 and wait, or ask the owner.

☐ matches

the Payments card now

the bot, after  Request payment

7 Type the amount

Do: type **4000** (digits only, no ₦, no comma).

You receive: the amount card naming you and your account.

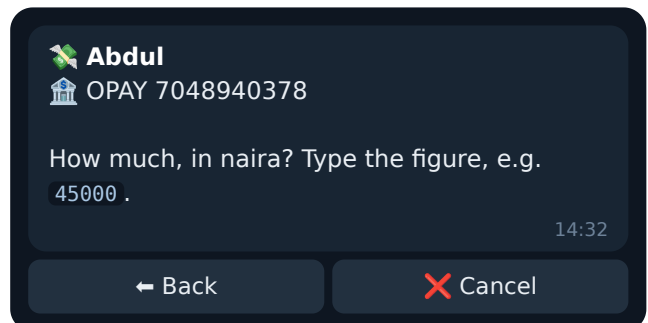

← **Back** on this card and the next ones takes you back to the **Payments hub**, not to the previous question. If you want to change something, go back and start the request again — nothing is sent until you tap  Submit.

If the bot says something else:

-  ... with a reason — the figure was not a valid amount. Type digits only.

☐ matches

the bot, on your phone

8 Type the reason

Do: type **Transport to Idumota**. Between 3 and 120 characters; there is no skip — every payment must say what it is for.

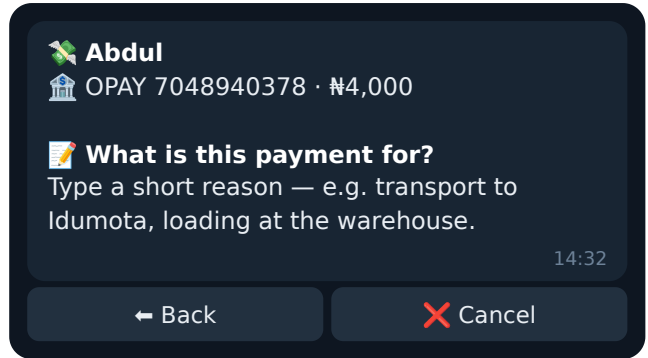

You receive: the  **What is this payment for?** card, with your amount already on line two.

If the bot says something else:

- ⚠ *Give a reason of 3 to 120 characters.* on top of the same card — too short or too long; type it again.

☐ matches

the bot, on your phone

 **Abdul**
 OPAY 7048940378 · ₦4,000

 **What is this payment for?**
Type a short reason — e.g. transport to Idumota, loading at the warehouse.

14:32

← Back ✗ Cancel

9 Send the bill photo

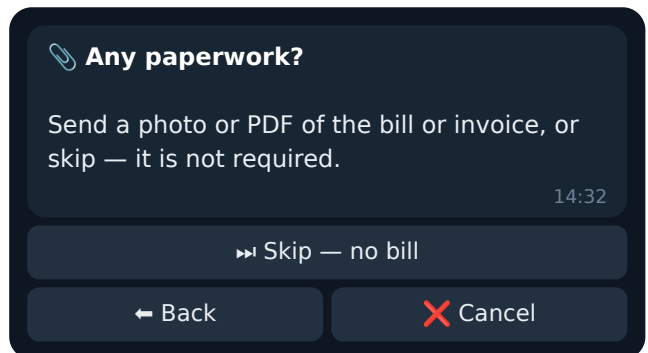

Do: send the **bill photo** (a normal photo is fine here, or a PDF as a File). For this test do **not** skip — the admins and finance must see the bill.

You receive: the  **Any paperwork?** card. After you send the photo the bot goes straight to the confirm card.

A real request may skip this with **»» Skip — no bill**. Then the cards simply have no  line.

☐ matches

the bot, on your phone

 **Any paperwork?**

Send a photo or PDF of the bill or invoice, or skip — it is not required.

14:32

»» Skip — no bill

← Back ✗ Cancel

10 Check and submit

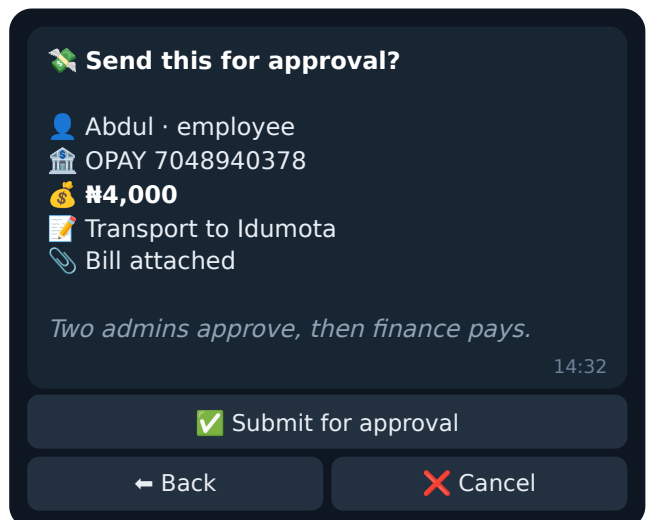

Do: read every line. If they are right, tap  **Submit for approval**.

You receive: the **Send this for approval?** card: your name, account, **₦4,000**, the reason and  *Bill attached*.

For ₦50,000 and above the amount line also says ⚠ *large payment*. Not for ₦4,000.

☐ matches

← Back ✗ Cancel

11 Your receipt

Do: nothing more to tap — a new card arrives below; the old **Send this for approval?** card stays on screen — its button no longer does anything (tapping it only says *That screen expired.*). Note the **PAY-...** number: it is on every later message about this payment.

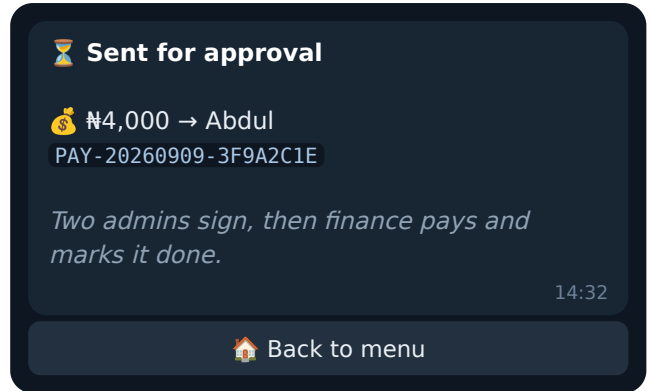

You receive: ⌚ **Sent for approval** with the amount and the PAY number. Both admins now have your card and the bill photo on their phones.

If the bot says something else:

- ⚠️ *Could not submit: <error>* — nothing was sent; tell the owner.

☐ matches

a new card, sent straight after

Part C · Wait — four messages will come, in this order

12 First signature

Nothing to do — you will receive one plain message when the **first admin** signs. It names him.

You receive: the 🗯️ “1 of 2 admin approvals — signed by Owner” message.

☐ matches

the bot, when the Owner signs

🗯️ Your request (9ddc4b7e-2f1a-4c58-9e0b-7a1d3c5f2b84) has 1 of 2 admin approvals — signed by Owner. One more to go.

14:40

13 Second signature — one message, two lines

Nothing to do — you will receive **one** plain message with **two lines** when the **second admin** signs. The second line names both signers and says the payment is now with finance.

You receive: one message. Line 1: ✅ “Your request R-9DDC has been approved by admin. Changes applied.” Line 2: ✅ “Payment of ₦4,000 to Abdul approved by Owner || Admin 2 — now with finance to pay.”

the bot, when Admin 2 signs

✅ Your request R-9DDC has been approved by admin. Changes applied.
✅ Payment of ₦4,000 to Abdul approved by Owner || Admin 2 — now with finance to pay.

14:45

If the bot says something else:

- ⚠️ *Your request (9ddc4b7e-2f1a-4c58-9e0b-7a1d3c5f2b84) was approved but could not be completed. Admin has been notified. Please follow up.* — both admins signed but the bot could not write the record. Tell the owner.

☐ matches

14

Paid — the moment finance marks it done

Nothing to do — you will receive the **Paid notice** when the Office phone taps ✓ Mark Done. This can be minutes or hours later — finance pays by hand first. It arrives **before** any screenshot.

You receive: the plain-text Paid message: amount, reason, account, who paid and when, the PAY number and both approvers. The Owner and Admin 2 get exactly the same message at the same moment.

☐ matches

the bot, when finance taps ✓ Mark Done

Checklist · every message the Operations Officer should see, in order

Tick each one as it arrives. The order matters — it is part of what is being tested.

When	What arrives
☐ Step 1	 Payments card — <i>no registered account yet</i>
☐ Step 2	 Account for Abdul — asks for 10 digits
☐ Step 3	 Type it once more →  7048940378 Which bank? ( OPAY chip present)
☐ Step 4	 Register this account? → a new card  Sent for approval (the old card stays, its button dead)
☐ Step 5	 Your request (...) has 1 of 2 admin approvals — signed by Owner. One more to go.
☐ Step 5	 Your request R... has been approved by admin. Changes applied.
☐ Step 6	 Payments now says <i>You have 1 registered account</i> →  Pay into which account? with your chip
☐ Step 7	 Abdul /  OPAY 7048940378 / How much, in naira?
☐ Step 8	 What is this payment for?
☐ Step 9	 Any paperwork?
☐ Step 10	 Send this for approval? — ₦4,000 · Transport to Idumota · Bill attached
☐ Step 11	a new card  Sent for approval — ₦4,000 → Abdul · PAY... (the old card stays, its button dead)
☐ Step 12	 1 of 2 admin approvals — signed by Owner
☐ Step 13	ONE message, two lines:  Your request R... has been approved by admin. Changes applied.   Payment of ₦4,000 to Abdul approved by Owner Admin 2 — now with finance to pay.
☐ Step 14	 Paid — ₦4,000 to Abdul (employee) ... Paid by Office · date, time ... approved by Owner Admin 2
☐ Step 15	 Proof of transfer — PAY... (photo) — only if finance sent one; it comes AFTER the Paid notice
☐ Step 16	 My requests:  ₦4,000 — paid ·  Transport to Idumota
☐ Exit A	 Your request R... has been rejected by admin. · My requests:  rejected
☐ Exit B	 Payment declined — ... was not paid. + reason · My requests:  declined by finance · reason

If anything differs, screenshot it and send it to the owner.

Include the whole card — the time on it and the buttons under it. A wrong word, a missing line or a message that arrives in the wrong order all count.
